WARMTH/CUSHIONING

From our research Warmth and Cushioning are the key features that consumers are looking for when choosing a new pair of Bridgedale socks.

To help with the decision process our rating system is clearly seen on the front of the pack as a quick and easy reference for the consumer to self select the product required.

SOCK TECHNOLOGIES

MOISTURE MANAGEMENT SYSTEM		Allows the transfer of moisture away from the surface of the skin to keep feet warm, dry and comfortable.
PERFORMANCE FIT		Every course has LYCRA® running through it giving a close supportive fit from foot to calf.
COMFORT FIT		Close supportive fit on your foot with a looser comfort fit around your calf. Allows sock cuff to be worn up or down.
THERMO FIT		Thermo setting every Bridgedale sock ensures a perfect fit. Wash after wash the sock returns to its designed size ensuring a perfect fit every time.
WOMENS FIT		Bridgedale were the first to offer a true WOMENS FIT sock. Women's styles are slimmer fitting, have bespoke sizing, adapted toe box and heel cup areas.
FLAT TOE SEAM		An almost invisible toe seam closes the toe box creating a comfortable, flat seam that doesn't create excess bulk or cause irritation.
OVERFOOT VENTILATION		Bridgedale's open mesh structure reduces insulation and promotes easy moisture transportation.
FORWARD FLEX		Prevents the sock from 'bunching' under the shoe tongue which helps to ensure comfort.
SHOCK ZONES		Advanced zonal padding system that provides extra support and comfort to areas of the foot and leg.
ELASTICATED ARCH		Keeps the sock locked in position. During wear this reduces the possibility of bunching and rucking which could cause irritation or blisters.
Y HEEL		Creates a 3D shaped heel cup that prevents excess bulk and slippage which helps to ensure comfort.
ANTI-SHOCK CUSHIONING		A loop within a loop that offers an additional level of impact protection resulting in all day long comfort.
WATERPROOF & BREATHABLE		Allows perspiration to pass to the outer layer of the sock while preventing outside water from getting inside. 15,000 MP / 10,000 WP.
WINDPROOF		Prevents wind chill, the lowering of body temperature due to the passing flow of cool air across the skin, exacerbated when skin is wet.
4 WAY STRETCH		A stretch PU membrane together with a matrix lamination process bonds three layers together ensuring they have excellent stretch.
DURABLE OUTER		An extremely durable and long lasting outer sock protects the Waterproof Membrane against abrasion from the boot.

Bridgedale socks are guaranteed for their lifetime against faults in workmanship and materials.
(5 years in Germany)

FUSION TECH

Fusion Technology is the unique blend of yarn and knitting technology that sets Bridgedale apart from other sock brands. It is the combination of the highest quality natural yarns, wrapped with high performance microfibres knit and finished on the latest machinery to create socks that ensure all day comfort. These unique combinations place yarns where they are needed to ensure that whichever Bridgedale sock you choose, they will perform to the highest level.

MERINO PERFORMANCE

FusionTech Merino Performance brings together Merino Wool, known for its anti-bacterial properties, New Wool with its soft, resilient fibres and technical synthetic yarns in a knit to provide a close supportive fit with resilient padding, balanced insulation, moisture wicking and outstanding durability for all day comfort. Ideal for long distance walking and trekking.

MERINO COMFORT

FusionTech Merino Comfort intimately blends together Merino Wool with its unrivalled fineness and anti-bacterial properties with technical synthetic fibres in a knit that has a faster drying time and longer lasting durability than that of Merino Wool alone. The unrestrictive knit, softness and superb wicking performance help keep feet dry and comfortable where ever the adventure.

MERINO COOL

FusionTech Merino Cool keeps feet dry and comfortable when you are working at your hardest. Blending together Merino Wool, known for its softness, moisture management and anti-odour characteristics together with high performance synthetic fibre in socks with a close supportive fit, targeting T2 padding and maximum ventilation.

COOLMAX® PERFORMANCE

FusionTech Coolmax® Performance brings together Coolmax® known for its softness and moisture wicking properties with technical synthetic fibres in a knit to provide a thin, close supportive fit with targeted T2 padding, balanced insulation and outstanding durability. Ideal for walking and trekking in warmer climates in lighter footwear.

COOLMAX® COMFORT

FusionTech Coolmax® Comfort maximises the natural benefits of cotton yarns with the wicking properties and softness of Coolmax® in a comfortable unrestrictive knit. The softness and superb wicking performance help keep feet dry and comfortable whilst walking and trekking in warmer climates.

STORM PERFORMANCE

FusionTech Storm Performance places Merino Wool, known for its anti bacterial and moisture management properties, next to the skin, laminated inside a soft flexible breathable HydroTech membrane to provide durable, waterproof and windproof comfort.

THERMAL LINER

FusionTech Thermal Liners are primarily knit with EnduroFil™ our own formulation of polypropylene fibre, with the lowest thermal conductivity of any yarn making our thermal liners our warmest by weight of sock in our range.

COOLMAX® LINER

Coolmax® liners have a large contact area with the skin and utilise the moisture wicking properties of Coolmax® to move moisture swiftly out to the larger surface area of main sock where it can be evaporated quicker.

COOLMAX® is an incredibly soft yarn with a 4-channel construction that Bridgedale use to draw moisture away from the body to keep the wearer cool and dry on hot days, and trap air to help insulate on colder days.

LYCRA® is used in every sock in the Bridgedale range. It is an elastic fibre, which ensures Bridgedale socks, fit and stay fitted. LYCRA® helps Bridgedale socks keep their shape year after year. LYCRA® is also knit in specific zones in certain socks in the range to further improve fit and long term comfort.

LYCRA® SPORT branding is the accreditation given to sports socks with a premium level of elastification in the sock body. Bridgedale socks with LYCRA® SPORT branding, offer optimised performance for athletes who want the most from their technically advanced socks. The LYCRA® fibre also gives Bridgedale socks long lasting fit and comfort, keeping their shape wash after wash.

At Bridgedale we believe it's the little things that make the biggest difference to our lives.

It's the little things that put a smile on our faces and a spring in our step.

It's the little things that come together to make big things happen. For over a century our socks have been one of the little things that transform your journey every day.

Our passion, experience, and care for every tiny detail, from our FIT, our FUSION TECHNOLOGY and our GUARANTEE, have helped us create the world's most comfortable and enduring socks.

Little by little. Step by step. We're changing the world beneath your feet.

It is often said when we have visitors come to our factory that we are not simply a sock knitter, we are a family of sock engineers. For over 100 years we have knit socks in Newtownards and over that time we think we have become pretty good at it. We push our knitting machines to their limits to see what they will do to enhance comfort or increase sock durability and the machine manufacturers have said on several occasions that these machines are not supposed to do what we get them to do.

Bridgedale[®]
LITTLE THINGS MATTER

In 1992 we started to “twist” natural yarns with man-made fibres to create proprietary yarns that enhance the durability and comfort of Bridgedale socks. Still found at the heart of every Bridgedale sock we branded this process Fusion Technology and for the last 25 years we have been refining and improving this technology to bring great comfort and durability to our customers.

15 years ago, Bridgedale launched the first truly sized women's technical outdoors socks. Through research and testing we recognised women have a wider forefoot with shorter toe bones, a narrower heel, and a shorter arch length. This research and our continual quest to challenge what our knitting machinery could allow us to do, not only did we make a bespoke womens fit but we could also knit better fitting socks throughout our entire range.

We have been global leaders in technical outdoor sock development for nearly 30 years and many of the concepts and developments we have commercialised can be found as standard throughout the market. One of our proudest developments we call ThermoFit. This ensures each Bridgedale sock feels like a new sock every time. Not only did this technology improve the longevity of our socks but we also dramatically reduced our water consumption in our finishing process.

THERMO FIT

This hammer might look old and past its best. And these yarn cones may look dirty and abandoned but both of these sit in our mechanic's workshop, and are used everyday to make sure our plant is running perfectly. The hammer has been repaired, by a mechanic who has long since left, to last a lifetime. The hammer and its story remain and as you walk around the factory you can see many more examples of tools and practices that programmers, knitters, mechanics, technicians and packers have developed, each with its own job to do and story to tell.

In 2012 we developed a new packaging concept that removed all the hard plastic parts from our packaging and reduced our demand for paper and card by 40%. As well as the environmental benefits this packaging wrap allowed customers to easily see the socks and remove them from the packaging if they wished without damage to either the socks or the wrap. In 2018 we redeveloped this packaging to make it easier for customers to self-select Bridgedale products without retailer input as well as further reducing our demand on paper stocks.

At Bridgedale we believe it's the little things that
make the biggest difference to our lives.

It's the little things that put a smile on our faces
and a spring in our step.

It's the little things that come together to make big
things happen. For over a century our socks have
been one of the little things that transform your
journey every day.

Our passion, experience, and care for every tiny
detail, from our FIT, our FUSION TECHNOLOGY and
our GUARANTEE, have helped us create the world's
most comfortable and enduring socks.

Little by little. Step by step. We're changing the
world beneath your feet.

Bridgedale, Making little things matter.
